3. After your injection

- Storage Information
  - Store TREMFYA at 36° to 46°F (2° to 8°C)
  - Do not freeze TREMFYA or prefilled syringe

- Safety Information
  - Keep TREMFYA in its original carton and all medicines out of reach of children.
  - Do not share your TREMFYA prefilled syringe with anyone.
  - Keep prefilled TREMFYA syringes in the original carton to protect from light and physical damage.

- Needle cover
  - Before use, remove needle cover as shown.
  - Do not touch needle or let it touch any surface.
  - Needle cover can be closed with a tight-fitting, puncture-resistant lid, without air holes.
  - Inspect carton: The carton is red, hard, thick, scaly or affected by psoriasis.
  - Inject into skin that is tender, bruised, red, hard, thick, scaly or affected by psoriasis.

- Inspect liquid
  - Remove your TREMFYA prefilled syringe from the refrigerator. Shake the prefilled syringe before attempting to inject.
  - Do not open the prefilled syringe any other way.
  - Check the expiration date (EXP) on the back panel of the carton.
  - Do not use your prefilled syringe if the expiration date has passed.
  - Do not inject TREMFYA if the perforations on the carton are broken.
  - Check your healthcare provider or pharmacist for a refill.

- Clean injection site
  - Wash with soap and water for at least 1 minute. Wipe your clean injection site with an alcohol wipe and allow it to dry.
  - Do not touch, rub or blow at the injection site after you have cleaned it.

- Dispose of your prefilled syringe
  - Put your used TREMFYA prefilled syringe in a household sharps disposal container right away after use.
  - Do not re-use or dispose of your TREMFYA prefilled syringe in household trash.
  - Do not dispose of your used sharps disposal container.

- Need help?
  - Call your healthcare provider if you have questions about your medical condition.
  - Call 1-800-JANSSEN (1-800-526-7736) for more information, see “How should I dispose of the used prefilled syringe?”

- Instructions for Use
  - Treating Inflammation of Arthritis (See Step 3)
  - After one dose, even if there is liquid left in the syringe.
  - Do not reuse your TREMFYA prefilled syringe.

- Prefilled Syringes
  - TREMFYA comes as a single-dose prefilled syringe containing one 100 mg dose.
  - Each TREMFYA prefilled syringe is used one time. The used prefilled syringe may be discarded one hour after use.
  - Each TREMFYA prefilled syringe is designed to be used one time.
  - Do not re-use or re-fill your TREMFYA prefilled syringe.
  - If you have healthcare provider devices that you or a caregiver may be able to give injections of TREMFYA at home, you should receive training on the right way to prepare and inject TREMFYA using the prefilled syringe before attempting to inject. Do not try to inject yourself until you have been shown the right way to give the injection.
  - Read this instructions for use before using your TREMFYA prefilled syringe and each time you use it. This may reduce the risk of injury.
  - Do not freeze TREMFYA or prefilled syringe.
  - Do not share your TREMFYA prefilled syringe with anyone.
  - Do not needle cover back on, as this may damage the needle.
  - Do not use your TREMFYA prefilled syringe if the carton is broken.
  - Call your healthcare provider about your medical condition or your treatment.
  - The TREMFYA prefilled syringe is intended for injections under the skin into the designated areas. After injection, the needle will retract into the body of the device and lock into place.
